

COMPANY PROFILE 2026

Architectural metalwork and contract furniture, from two family factories.

Stainless steel cladding, lift portals, reception desks and lobby furniture for business centres, offices, residential towers, hotels and restaurants. Made to the drawings of architects and contractors near Moscow, coordinated in Dubai.

Metal you can see. Furniture you can sit on. One maker for both.

KARLSON began more than twenty years ago as a small upholstery workshop. In 2015 we started welding steel frames for our own sofas, and soon other furniture makers, restaurants, designers and contractors were ordering our metal too. Today the family runs two factories near Moscow: a metal workshop in Bronnitsy and an upholstery factory in Ramenskoye. Frames welded in one are upholstered in the other, so one team answers for the whole piece.

20+ years making upholstered furniture	2 own factories: metal and upholstery	29,600+ sq ft of production floor, 2,750+ m ²
15,000+ upholstered pieces made	24 h to a priced quote from your drawings	5 years warranty, written into the contract

Architects and designers

Shop drawings for your review, free finish samples and a sample piece on request, so the interior is built as you drew it.

Main, EPC and fit-out contractors

A priced bill of quantities within 24 hours, shipments planned around your programme, documents ready for your submittal.

Developers and operators

One family factory accountable for metal and upholstery, with a 5-year warranty in the contract.

Business centre lobby in brushed stainless steel and leather, designed by Kemelin Partners, metalwork and furniture made by KARLSON.

From a single reception desk to a full lobby.

Architectural metalwork

Cladding	walls and columns, flat or radius, brushed, mirror, perforated or PVD-coloured stainless
Lift portals and cars	surrounds, returns, full-height portals, lift car walls and lit ceilings
Reception desks, bar counters	one piece or in sections that pass a standard door
Frames and structures	furniture frames, shelving, partitions, planters, balustrades
Finishes	stainless brushed, mirror or perforated; PVD gold and other shades matched to your sample; powder coat to any RAL

Contract furniture

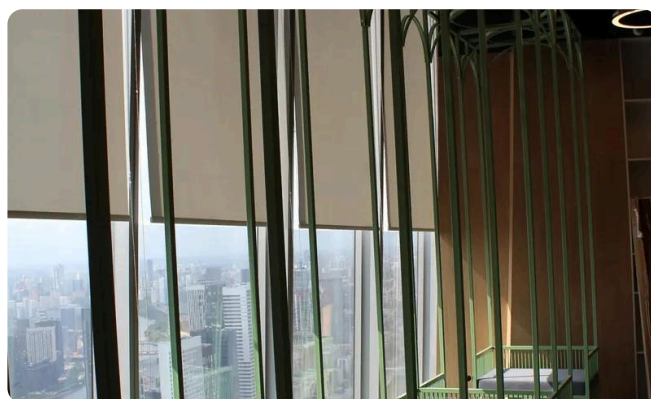

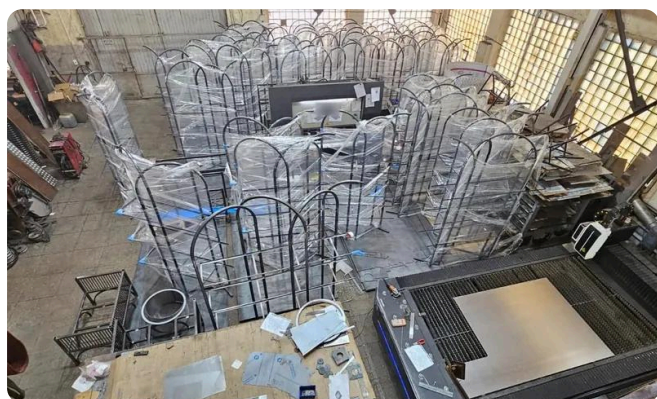

Seating	sofas, banquettes, booths, armchairs, poufs, swivel and modular units
Hospitality	hotel rooms, lobbies, restaurants, bars and terraces
Workplace	lounge seating, acoustic pods, soft wall panels, kitchen islands
Public buildings	hospitals, universities, kindergartens
Metal and upholstery together	steel frames welded in Bronnitsy, upholstered in Ramenskoye

Brushed, mirror and PVD-coloured stainless steel and powder coat. Finish samples are free for designers and contractors.

Two factories near Moscow, one contract.

Metal workshop	155 Sovetskaya St, bldg 5, Bronnitsy, Moscow region · 750 m ² (8,070 sq ft)
Laser cutting	laser 1.5 kW, sheet up to 1500 × 3000 mm; carbon, galvanised and stainless steel including coloured stainless
Folding	press brake 63 t, bend length 2,500 mm, sectional tooling for boxes and frames
Welding	two welding stations including laser welding, seams ground flush
Powder coating	curing booth 4 × 2 × 2 m, any RAL colour
Upholstery factory	Ramenskoye, Moscow region · 2,000+ m ² (21,500+ sq ft), 50+ people
Upholstery capacity	up to 40 sofas or 80 armchairs a month on one model
Quality control	drawing check by our technologist before launch, first-piece check, final inspection before shipment

Steel arches for a high-rise office in Moscow: assembled and wrapped in our workshop (left), installed along the windows on site (right).

Nine steps from drawings to handover.

01 Drawings or BOQ Design drawings, a bill of quantities, an opening schedule or a sketch, in DWG, DXF, STEP, PDF or Excel.	02 Priced quote Within 24 hours: price, materials and lead time in one document.	03 Shop drawings Every piece drawn by us and sent for the designer's review.
04 Samples Finish samples free of charge, a sample piece on request.	05 Approval Drawings and finishes signed off before anything is cut.	06 Production In our own workshop and factory. The first piece of each batch is checked before the rest.
07 Final inspection Our technologist signs off every order before it is released for shipment.	08 Packing and shipping Export packing, protective film on finished metal, shipping documents.	09 Installation and handover Installation supervision by our specialist and step-by-step instructions, our Dubai partner coordinating on site.

On recent projects production took from 21 days for restaurant seating, counted from sample approval to shipment, to 8 weeks for an eighteen-piece stainless steel lobby. Lead time and delivery terms are stated in each quote.

What we send for your submittal

Shop drawings	PDF and DWG, every piece
Finish samples	stainless and powder coat, free of charge
Material data	steel grade and finish, data sheets for fabrics, foams and boards from their makers
Fire test reports	for the fabric and foam chosen to your specification, from their makers or an accredited laboratory
Quality record	first-piece check and final inspection, signed by our technologist
Packing list, warranty letter, care instructions	for every shipment; 5 years on every piece

Built for 46 °C outside and 24 °C inside.

The Dubai Building Code designs for 46 °C outdoors and about 24 °C at 50 % humidity indoors. We agree materials for each exposure at the sample stage and write them into the shop drawings.

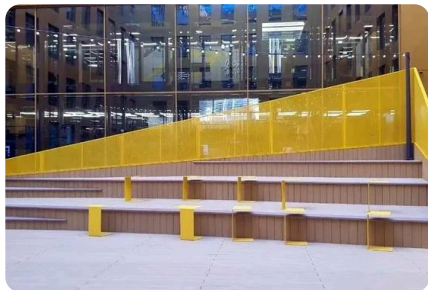

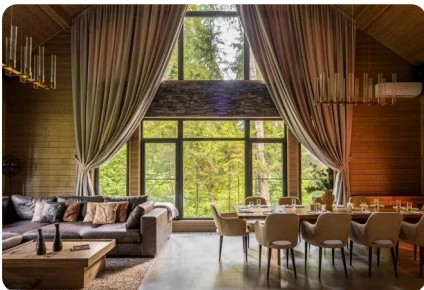

Stainless steel	grade 304 for air-conditioned interiors; 316L proposed for terraces, pool decks, podiums and coastal sites
Powder coat	any RAL colour for interiors; an outdoor-grade system agreed at the sample stage for exterior steel
Frames and boards	birch beam and moisture-resistant plywood for humid interiors, as in our bath houses; kiln-dried timber and moisture-resistant boards for air-conditioned rooms, E1 or CARB P2 on request
Foams and fabrics	dense polyurethane foams that keep their shape; combustion-modified foams and fire-rated fabrics where the specification calls for them; water-repellent and solution-dyed outdoor fabrics
Hardware	stainless or anti-corrosion coated hardware and heat-resistant adhesives near water and steam

Fire performance to your specification

Upholstered seating	BS 7176 low, medium (BS 5852 crib 5) or high hazard; EN 1021-1 and -2; CAL TB 117-2013 or NFPA 260 on US-led specifications
Wall panels and boards	to the class in the fire strategy: ASTM E84, BS 476 parts 6 and 7, or EN 13501-1
Evidence	test reports for the exact fabric, foam or board, from their makers or an accredited laboratory, included in the submittal

Indoor air and sustainability

Data for Al Sa'fat, Estidama, LEED	solvent-free powder coating with virtually no VOCs; E1 or CARB P2 boards on request; recyclable steel
---	---

Proven in heat, steam and weather: five bath houses, an outdoor courtyard amphitheatre, a city hospital whose upholstery takes standard disinfectants.

Delivered, installed, in use.
